### AMAZING RESULTS From Top Trainers

"I'm overwhelmed with the positive results! The competition horses have been given Equine with HydroFX® and the horses' hindquarter jump style has significantly improved. Even when given Equine with HydroFX® only two days prior to competition, the horses' residual stiffness afterwards is now non-existent, even on the Grand Prix height of 1.5m. These major improvements and amazing results are unheard of with any horse. To change a jumping form this significantly is next to impossible. The top performer riders of these horses are making extraordinary comments. I am beyond excited!"

**DAVE PRATT:** *Southern California and Canadian Equestrian Team Member and Elite Horse Riding Trainer*

"Our horse started the season in the 1.23m jumpers and finished at a Grand Prix level of 1.5m, thanks to Equine with HydroFX®. In just six short months, we noted an overall increase in the horses' jumping ability, especially in the use of his hindquarters. Toward the end of the season the horse was not given Equine with HydroFX® and he struggled to jump at even the 1.35m level. He was immediately given Equine with HydroFX® again and his jumping improved within 24 hours to the point that the 1.5m level was jumped effortlessly, with a clear round.\*"
